

Program:-

```
import java.net.*;

class InetAddressEx
{
    public static void main(String args[]) throws UnknownHostException
    {
        InetAddress i=InetAddress.getLocalHost();
        System.out.println("Local Host="+i);
        i=InetAddress.getByName("www.msbte.org.in");
        System.out.println(i);
        InetAddress sw[]=InetAddress.getAllByName("www.google.com");
        for(int j=0;j<=sw.length;j++)
        {
            System.out.println(sw[j]);
        }
    }
}
```

Output:-

```
C:\> Command Prompt

C:\adv>java InetAddressEx
Local Host=LAPTOP-N28U34TQ/192.168.56.1
www.msbte.org.in/43.240.64.241
www.google.com/216.58.196.68
```
