

Program:-

```
import javax.swing.*;
import java.awt.*;
/*<applet code=JComboex.class height=500 width=500></applet>*/
public class JComboex extends JApplet
{
    JComboBox jc;
    public void init()
    {
        Container c= getContentPane();
        c.setLayout(new FlowLayout());
        jc=new JComboBox();
        jc.addItem("Maharashtra");
        jc.addItem("Goa");
        jc.addItem("Andhra Pradesh");
        jc.addItem("Gujarat");
        jc.addItem("Jammu and Kashmir");
        jc.addItem("Kerala");
        jc.addItem("Orrisa");
        jc.addItem("Punjab");
        jc.addItem("Rajasthan");
        add(jc);
    }
}
```

Output:-
